

Magnets: a downward action produces a diagonal snap

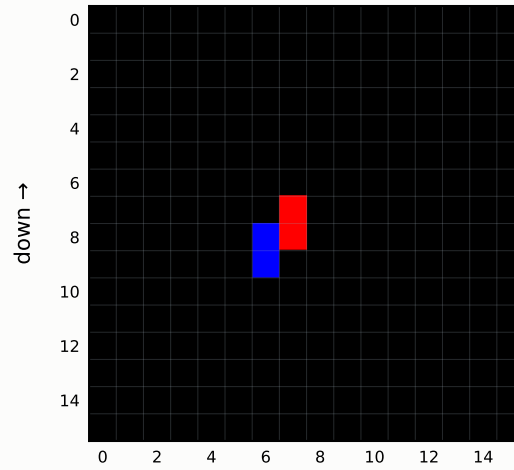

Recorded train_d1 frames; annotations from learned P. Coordinates are row, column.

Step 32

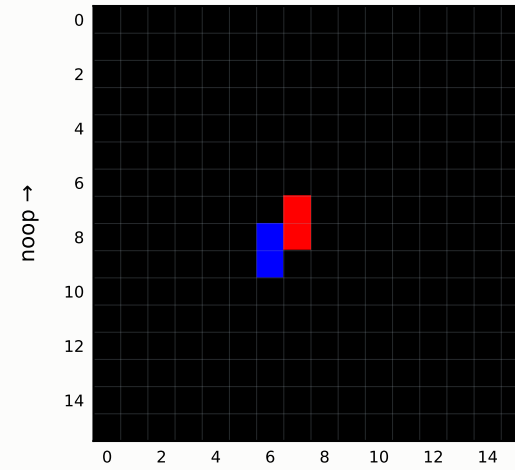

two aligned cells
rDist2 / rDist2

Step 33

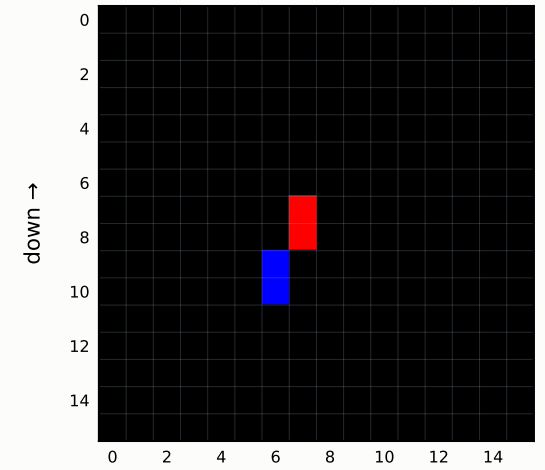

snapped down and right
rDist1 / noRedRow

Step 34

stable under noop
rDist1 / noRedRow

Step 35

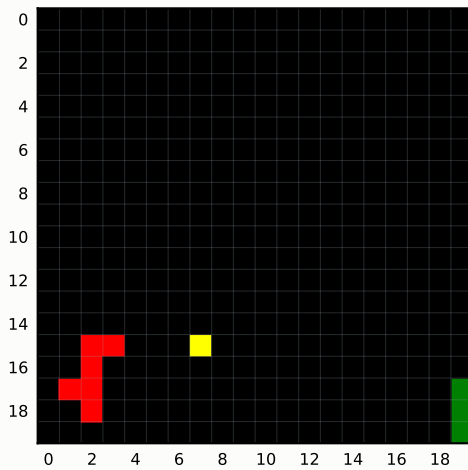

moved clear of red rows
noRedRow / noRedRow

Dino: fall, land, stay grounded, then jump

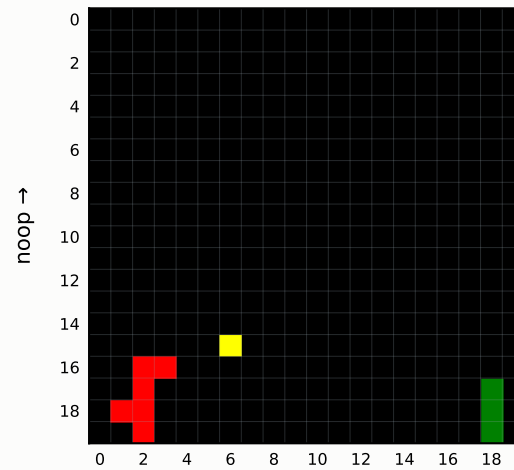

Recorded train_d1 frames; annotations from learned P. Coordinates are row, column.

Step 100

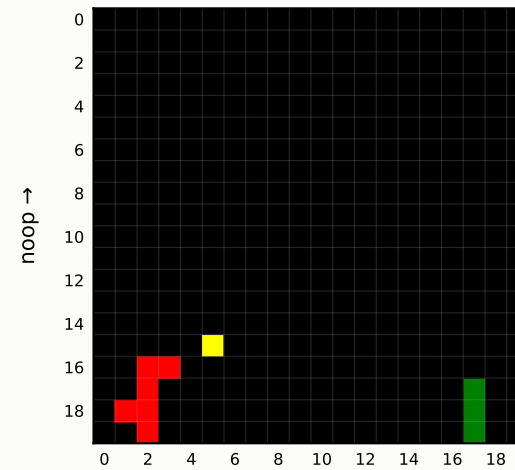

above the floor
flags:green:bottom

Step 101

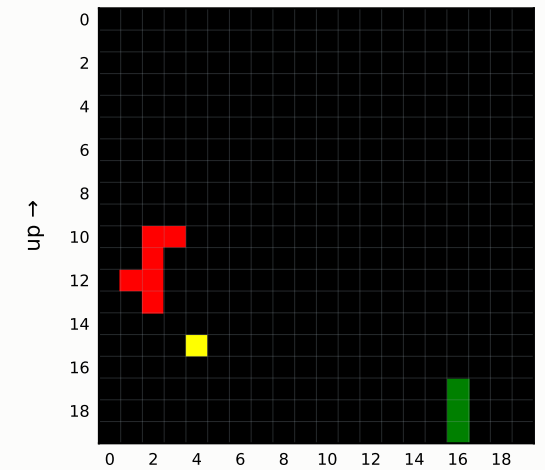

landed
flags:green:bottom|red:bottom

Step 102

red stays; obstacles scroll
flags:green:bottom|red:bottom

Step 103

jumped six rows
flags:green:bottom

Candidate preview. Both are explored branches; see learning_evolution_joint_candidates.md for P/B checkpoints and limitations.
